

# Powering the Energy Transition

Then. Today. Tomorrow.

enÉrgia group

# Then

With a history of over 90 years, Power NI became part of Viridian Group (now Energia Group) in 1998.

Having been involved in wind energy since 2008, Hollyford is currently our oldest owned and operated wind farm, operational since 2014.

To ensure security of supply, in 2002 and 2007 we expanded into the area of gas with the commissioning of our two CCGT plants at the Huntstown site in North Dublin.

# Today

## Customer Solutions

**energia**

Our Customer Solutions business operates via the brands Energia in ROI and Power NI in Northern Ireland – supplying energy to over 880,700 homes and business across the island of Ireland with a range of new and innovative products.

Our Renewables business owns and operates 16 wind farms.

Our 17<sup>th</sup> and 18<sup>th</sup> wind farms are well under construction and ready to be commissioned shortly.

## Renewables

## Flexible Generation

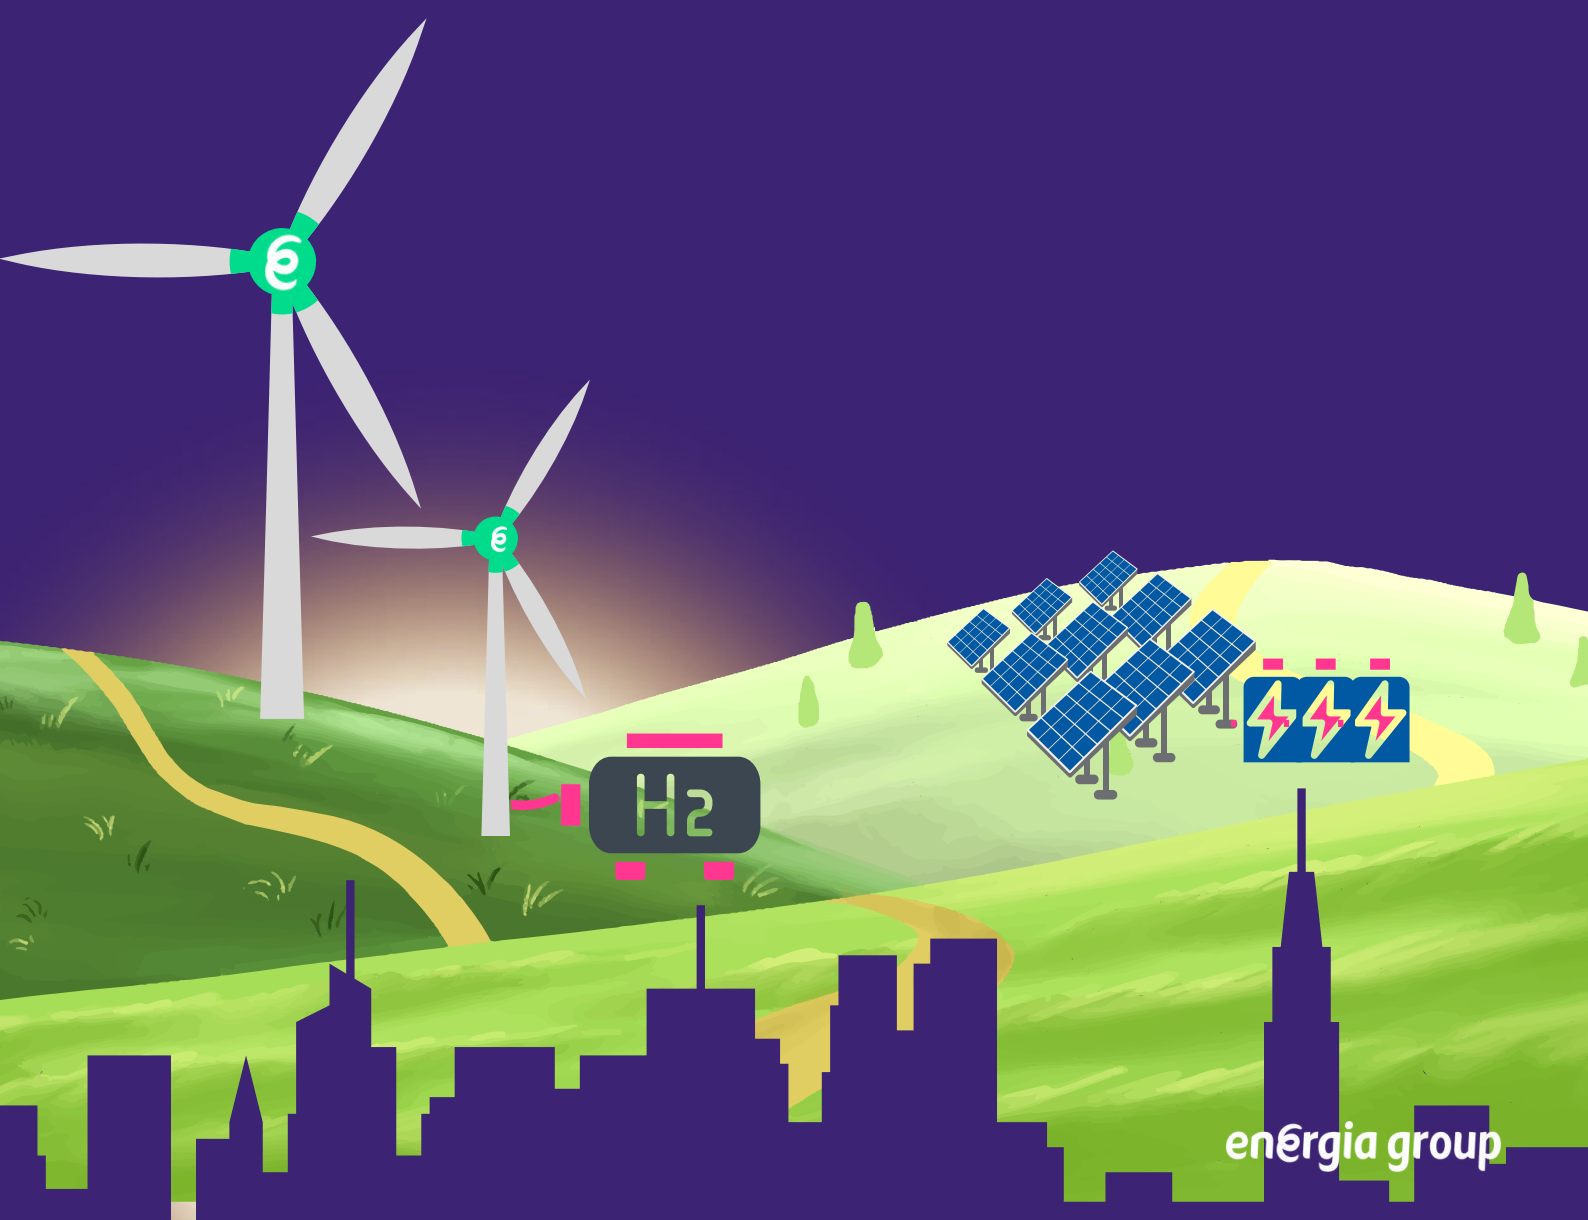

We have continued to provide critical security of supply via our two CCGT plants, the addition of a 50 MW emergency gas generation plant and a 50 MW battery facility in Belfast.

**energia group**

# Tomorrow

Looking ahead, we plan to **expand our renewable portfolio** into offshore wind, solar, battery storage and hydrogen while **investing in new digital technologies** and **increasing our flexible generation capacity**.
