

Site layout

SOLAR PANELS

The panels will cover less than 50% of the site and will provide space beneath them to accommodate farming activities, such as sheep grazing.

BIODIVERSITY ENHANCEMENT (Indicative area)

Solar farms allow biodiversity & wildlife habitat to flourish with the introduction of wild flowers, rich seed mixes, beehives, bat boxes & insect hotels.

ACCESS

Proposed access to the solar farm

FENCING AROUND SITE

SCREENING AROUND SITE

Well-established field boundaries already provide a good level of screening from view. Our planting plan will provide additional screening screening around the site
